ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: GRAPHICAL USER INTERFACE SYSTEM

(57) Abstract: The present invention relates to a graphical user interface for navigating among and selecting from selectable options presented on a display screen. A scrollable menu comprising a series of panels representing bookmarks and/or bookmark folders representative of the selectable options is displayed in an approximate semi-circular fashion along the bottom and the sides of the display screen. A cursor is displayed overlaid one panel at the bottom of the display screen. The cursor is scrollable through the series of panels through user input. Upon the cursor being scrolled to a panel appearing further up either side of the display screen than the panels at the bottom thereof the indicated panel is pulled down and stopped at the bottom of the display screen and the whole series of panels scrolled along with it. The user interface further provides for selection of the panel indicated by said cursor through user input.
